QUALITEM

PUBLISHER

FOR SHAREPOINT®

The Qualitem Publisher for SharePoint® Foundation is a flexible web content management platform that supports the creation and management of web content, site navigation, and look and feel.

Publisher adds significant value to Microsoft SharePoint® Foundation and raises the bar to a new level for industry Web Content Management Systems.

SharePoint® Foundation customers now have the opportunity to build and manage rich web content with incorporated publishing capability for managing the approval of web content.

With our easy install process, Publisher is installed quickly and easily across one or many site collections to give you the power of full web content management on the SharePoint® Foundation platform.
