

# TAB ROLLUP

FOR  
SHAREPOINT®

Most dynamic organizations have content stored in multiple locations and need to aggregate content into a single view.

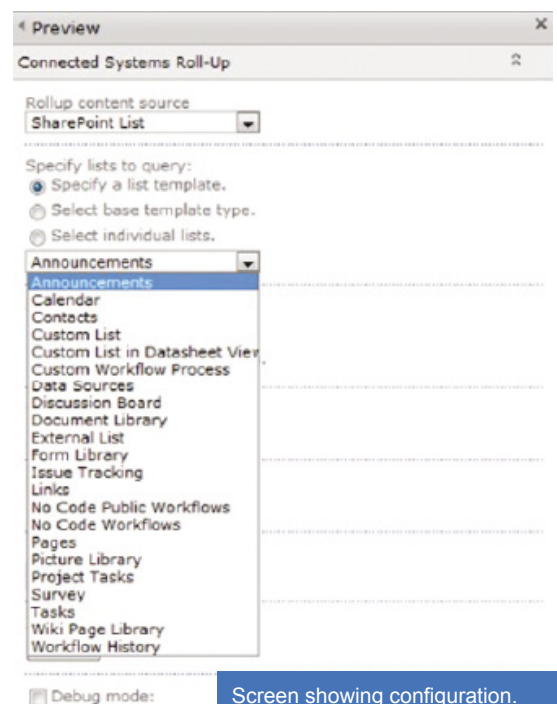

The Qualitem Tab Rollup web part for SharePoint® is a flexible content aggregator that supports both SharePoint® lists and XML content.

Tab Rollup can be used to retrieve content recursively from a site collection and display it as HTML.

Tab Rollup adds significant value to Microsoft SharePoint® and raises the bar to a new level for industry Content Management Systems.

## BENEFITS

- Aggregating content from single or multiple lists.
- Exposing content in multiple locations across your site using one single source.
- Flexibility in the presentation of content through XML and CAML.
- CAML builder to define better and more relevant queries.
- Debug mode to expose rendered XML.
- Audience targeting for SharePoint®, through the use of permissions.
- XML over HTTP that supports proxy server details.
- Template Rendering (Handlebar).
- Pagination.
- Easy installation.
